10–Week Summer Program

The program is designed to prepare undergraduate students for a graduate research career in Statistical Science. Students will have the opportunity to learn statistical and computational skills and to conduct research projects in one of the following areas: Extreme Value Theory, Multiple Comparisons, Multivariate Survival Analysis, Modelling of the power grid and other biomedical and Statistical Problems.

Students will receive a $5,000 stipend for the 10 weeks and up to a $600 to cover travel expenses. Lodging and meals will be provided for.

Eligibility

- Students majoring in mathematics, computer science, statistics, or related field who have had the calculus sequence and a course in linear or matrix algebra
- You must be registered as an undergraduate student and should not be graduating by the end of summer 2018
- You must be US citizen or permanent resident

Applications deadline is April 1st, 2018.
Application can be requested from: jrojo052@gmail.com

Grant support through the National Science Foundation and the National Security Agency
